

INNO-ST is a synergistic formulation of natural biopolymers, yeast extracts and highly selected activated montmorillonites in order to effectively control and manage a broad-spectrum of mycotoxins.

Mycotoxins risk is everywhere !

INNO-ST Benefits:

- Complete solution for mycotoxin issues caused by polar and non-polar toxins thus minimizing the damage from contamination.
- Helps protect the liver, improve gut health, enhance immunity and free-radical inactivation.
- Supports antioxidative and detoxifying processes in the liver.
- Enhances the immune system to counter immunosuppressive and inflammatory effect of mycotoxins.

INNO-ST Characteristics :

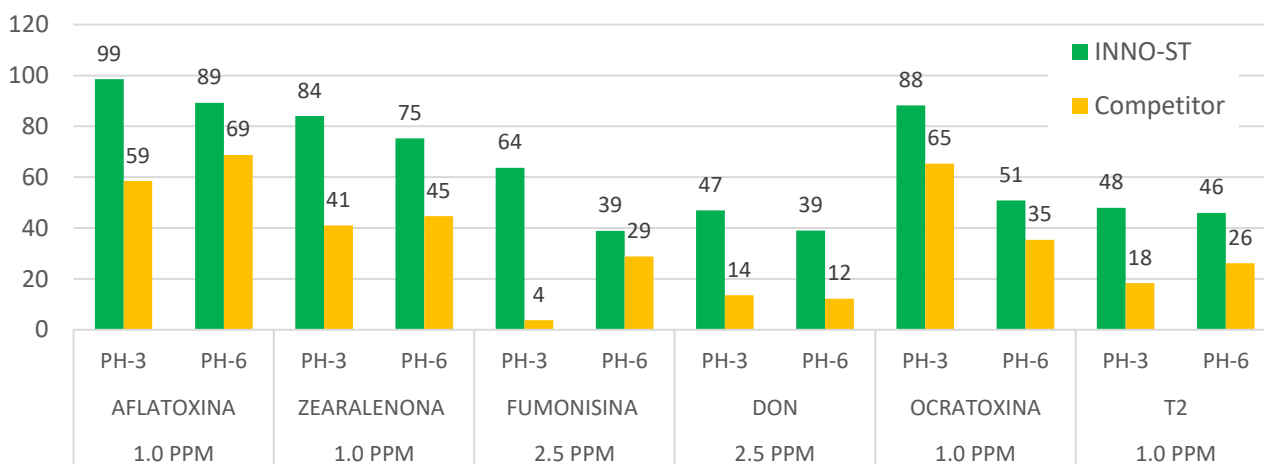

- Free flowing powder with good homogeneity in feed.
- Smaller particles size contributes 3.2billion particles per gram product, and improved surface area reaches 115m² per gram, increases mycotoxin binding ability.
- Broad-spectrum adsorption of various mycotoxins, especially for Aflatoxin B1, zearalenone.
- Enhanced effects on absorption of T-2 and DON, reducing the harm of mycotoxins to production animals.
- No affinity to various nutrients, such as vitamins, minerals, etc.
- Stable during stock and feed processing (conditioning, pelleting).
- Natural feed additive with no residue in the animal body, no adverse stimulation, and no influence on the digestion and absorption of nutrients.
- Low effective inclusion rate in feed.

INNO-ST Animal Effects:

- Absorb mycotoxins in the feed and minimize the damage caused by the toxins to the animal body.
- Reduce the damage of mycotoxins to the breeding system of animals, increase the fertility, and reduce the proportion of stillbirths, false estrus and abortions.
- Improve egg production rate and eggshell quality of poultry during the laying period, increase the fertilization rate and hatchability of breeders.
- Improve animal production performance and feed efficiency.

INNO-ST superior results in efficacy as mycotoxin binder vs competitor and stable in pH 3 and pH 6

Application:

Suitable for all species. Add to the feed according to the needs of each species, following the recommendation of the responsible technician or suggest below:

Animals	Dosage	Animals	Dosage
Poultry	0.3 - 2.0kg/ton	Ruminants	5 - 10g/head/day
Swine	0.5 - 2.0kg/ton	Pets	0.05 - 0.2%
Shrimp	0.1 - 0.5%	Fishes	0.05 - 0.1%

Storage: Store in a cool and airy place, free of pests, away from chemical products and strong odors.

Packing: 25kg multilayer paper bag with polyethylene inner liner.

Shelf life: 24 months from the date of manufacture, provided that the storage recommendations are followed.

All In One Solution To Mycotoxin Problems Management!
